

Thomas O. Merritt

Los Angeles, California • thomasolivermerritt@gmail.com • (661) 373-6814

Profiles: <https://thomasmerritt.github.io> | LinkedIn: [in/thomas-merritt](#) | Github: [ThomasMerritt](#)

SKILLS

Languages & Frameworks: Python, JavaScript, C++, SQL; Flask, React, Selenium, Apache Spark, REST APIs

Cloud & DevOps: AWS (ECS, DynamoDB, Lambda, IAM, CloudWatch), Azure, Docker, Git, Bash, CI/CD

Monitoring & Data: Datadog, Log Analysis, Microsoft Dynamics 365, CosmosDB, Big Data Management

Certifications: AWS Certified Developer – Associate (DVA-C02)

RELEVANT EXPERIENCE

NBCUNIVERSAL | Technical Business Analyst Intern | Los Angeles, CA

Apr 2026 - Present

- Performed cross-system data reconciliation across 3 enterprise platforms, validation alignment of 10,000+ budget records
- Designed executive-level dashboards that surfaced data alignment, eliminating reliance on tribal knowledge.
- Standardized master data mismatches across multiple granulated dimensions, improving clarity and audibility of reporting.
- Partnered with stakeholders to define reconciliation grain and identifiers, reducing false mismatches and investigation time.

AGILISIUM | Software Engineer Intern | Los Angeles, CA

Jan 2026 - Feb 2026

- Monitored high-traffic AWS systems via Datadog and CloudWatch to triage ECS health failures, API spikes, and DynamoDB/DAX performance anomalies.
- Correlated cache misses with RCU/WCU spikes and analyzed auto-scaling behavior during live Olympic traffic surges to optimize backend reliability.
- Partnered with DevOps and Engineering teams to triage production incidents, significantly reducing mean time to resolution (MTTR).

TELECOM IP | Software Engineer Intern | London, UK

Jun 2024 - Sep 2024

- Automated cell tower data extraction from government websites across Europe using a Selenium-based web scraper, eliminating over 200 hours of manual effort annually and accelerating data availability for decision-making.
- Designed the tech stack and wireframed a full-stack application leveraging Azure Maps to analyze cell tower data, improving pricing accuracy and negotiation outcomes, leading to more profitable agreements.
- Integrated real-time cell tower data with Microsoft 365 CRM, enabling seamless access to location-based insights through interactive map controls, reducing data retrieval time and increasing operational efficiency.

TRAPNSTUDIO | Software Engineer Intern | Riverside, CA

Feb 2024 - May 2024

- Contributed to the development of Vibecue, a DJ-driven music software designed to manage and control music queues in public venues; gained exposure to software engineering workflow and environments

PROJECTS

HOLLYWHATIF | Personal Project

2024

- Built a full-stack web application using Flask and Apache Spark to predict the impact of cast changes on IMDb ratings through real-time linear regression analysis.

EDUCATION

University of California Riverside | Riverside, CA

B.S. in Computer Science | GPA: 3.64/4.0

2024
